Technical Information

- Welded wire fence, plastic coated after welding, the core wires are galvanized, resulting in double protection against rust.
- Thick PVC coating is tightly bonded to wire - will not peel
- UV inhibitors in the vinyl retard degradation from sunlight
- Coating is flexible and durable - will not crack when the wire is bent
- We supply this product with mesh between 12.7 mm and 25.4 mm with a variety of wire thickness, making our products suitable for many industrial applications.
